The Shadowline Series is a modern uptake on the classic and timeless "fineline" wood profile - without any of the maintenance associated with wood. The Shadowline Series includes two 6" panels; one with a 6" reveal and one with two 3" reveals as well as a 12" panel with six 2" reveals. The distinct squared edges of the Shadowline profile are enhanced with a deep 1/4" (6.35mm) groove that reflects natural sunlight and creates defined shadow lines. Black PVC pigments, embedded in the panel, are UV stable, heat reflective and provide depth to each groove - resembling a slat cladding system.

This panel can be installed horizontally or vertically to resemble a board and batten look. Unique to the Shadowline series, panel profiles can be combined to provide endless design possibilities! Our low-maintenance, architectural products offer sustainable and realistic wood solutions for today's world.

Material: Rigid PVC  
Lengths: 12', 16', 20' & Custom Lengths Available
